

The Series30RK- a new series of precise, robust and easy to use total stations from Sokkia

ALMERE, NL, - October 04, 2005 - SOKKIA B.V. European head office today extended its total station range with a new series of reflectorless total stations, the Series30RK.

The new Series30RK feature the new innovative reflectorless RED-tech II EDM that provides reliable, long distance reflectorless measurement. The Class 3R laser models measure distances from 30 cm to 350 m with an survey-grade accuracy of $\pm(3+2 \text{ ppm} \times D)$ mm from 30 cm to 200 m and an accuracy of $\pm(5+10 \text{ ppm} \times D)$ mm from 200 to 350 m*. Its ultra-narrow visible laser performs accurate pinpoint measurement and serves as a convenient laser pointer.

The Series30RK is the first in its class to be equipped with a backlit alphanumeric keypad, for quick and easy entry of point data even when working in low light conditions. The IP66-grade protection against dust and water makes it suitable to work in rough environmental conditions. The Series30RK provides all the features a surveying partner needs to have, including a wealth of built-in survey programs, easy-to-view LCD screen, one-touch target selection function, long working duration with the Li-ion battery equipped as standard, a guide light unit for setting out quickly and a CF card unit (both factory option) and more.

The Series30RK consists of seven model options according to laser class and angle reading accuracy: The SET230RK3 (2" /0.6 mgon), SET330RK3 (3"/1 mgon) and SET530RK3 (5"/1.5 mgon) are Class 3R long range models and the SET230RK (2" /0.6 mgon), SET330RK (3"/1 mgon), SET530RK (5"/1.5 mgon), SET630RK (6"/1.9 mgon) are Class 2 models.

About Sokkia

Sokkia is a leading innovator in developing complete measurement solutions for surveying, mapping/GIS, industrial measurement and construction applications. Sokkia's line up of surveying instruments includes everything from electronic total stations and distance meters, to electronic and optical theodolites, levels and laser products. Sokkia B.V., European head office, located in Almere, the Netherlands is responsible for distribution, service and marketing in more than 30 European countries since 1991. Sokkia B.V. is part of Sokkia Co. Ltd., the worldwide headquarters, founded in 1920 and located in Tokyo, Japan.
